

cpu-zigzag-app CPU Watch (6 minutes)

Resource: Azure Container App 'cpu-zigzag-app'
Window (UTC): 2025-09-08T10:58:00Z to 2025-09-08T11:03:00Z

Summary

Samples: 6
Min: 89.5% Avg: 91.0% p95: 92.5% Max: 93.0%

Observations

CPU remained persistently high (~90–93%) across the window.
Pattern indicates sustained saturation rather than isolated spikes.

Conclusions

State: saturated/near-saturation; at risk of throttling or latency under further load.

Recommendations

- Increase CPU headroom (raise per-replica CPU or scale out replicas).
- If autoscaling is enabled, lower scale-out thresholds (e.g., trigger at ≤70–75% CPU).
- Profile hot paths, cache expensive work, and batch operations where possible.

Run-by-Run Samples (1-min avg)

Time (UTC)	CPU %
2025-09-08T10:58:00Z	93.0
2025-09-08T10:59:00Z	89.5
2025-09-08T11:00:00Z	91.0
2025-09-08T11:01:00Z	91.0
2025-09-08T11:02:00Z	91.0
2025-09-08T11:03:00Z	90.5
